To download and install Expanel, you must first log in to your user dashboard on the website https://www.expanel.app. To do this, use the "Login" button and enter the username and password you chose during registration to access your account. If you have not registered yet, first click on the "Register" button located at the top of the main page of the website.
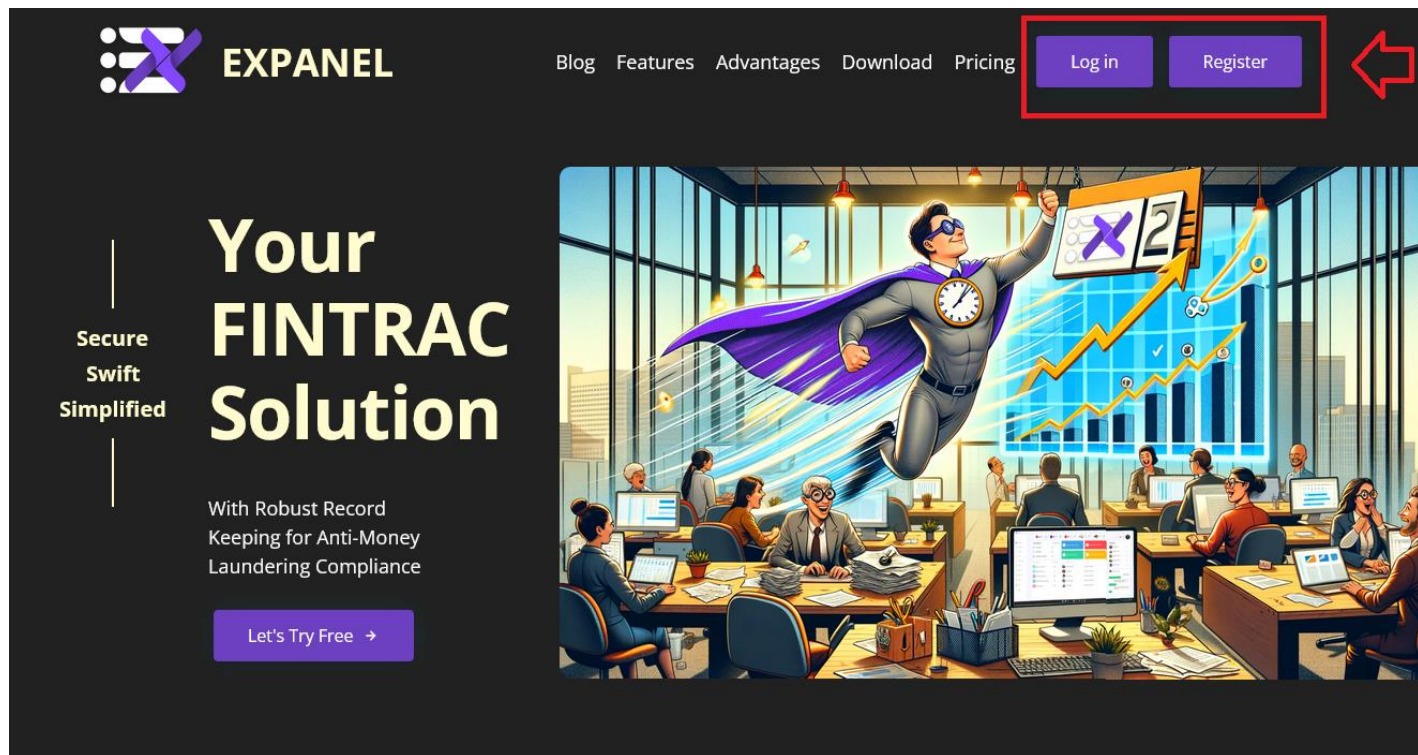

In the next step, to register, you need to enter your name and email address and create a secure password for your account. Please note that the account activation code will be sent to your email, so make sure to use an email address that you have access to. Additionally, to increase account security, it is recommended to use a strong password with at least 8 characters, including a combination of uppercase and lowercase letters and numbers. Finally, click on the "Register" button to receive the account activation email.

If a window with the message "I'm not a robot" is displayed, simply click on the checkbox. If necessary, answer the simple questions that are asked to enable the "Register" button so that you can complete the registration process.
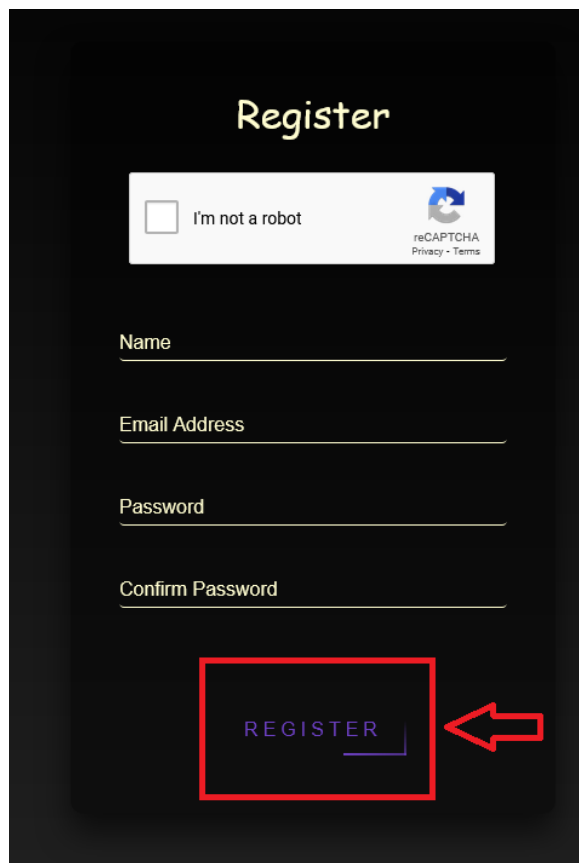

Now, check your email and click on the account activation link. Please note that it may take up to 5 minutes to receive the email. The activation email might also mistakenly end up in your Spam folder, so be sure to check your Spam folder and mark it as not spam if necessary. If you still haven't received the email, you can click on "Click here to request another" to request the activation email again.
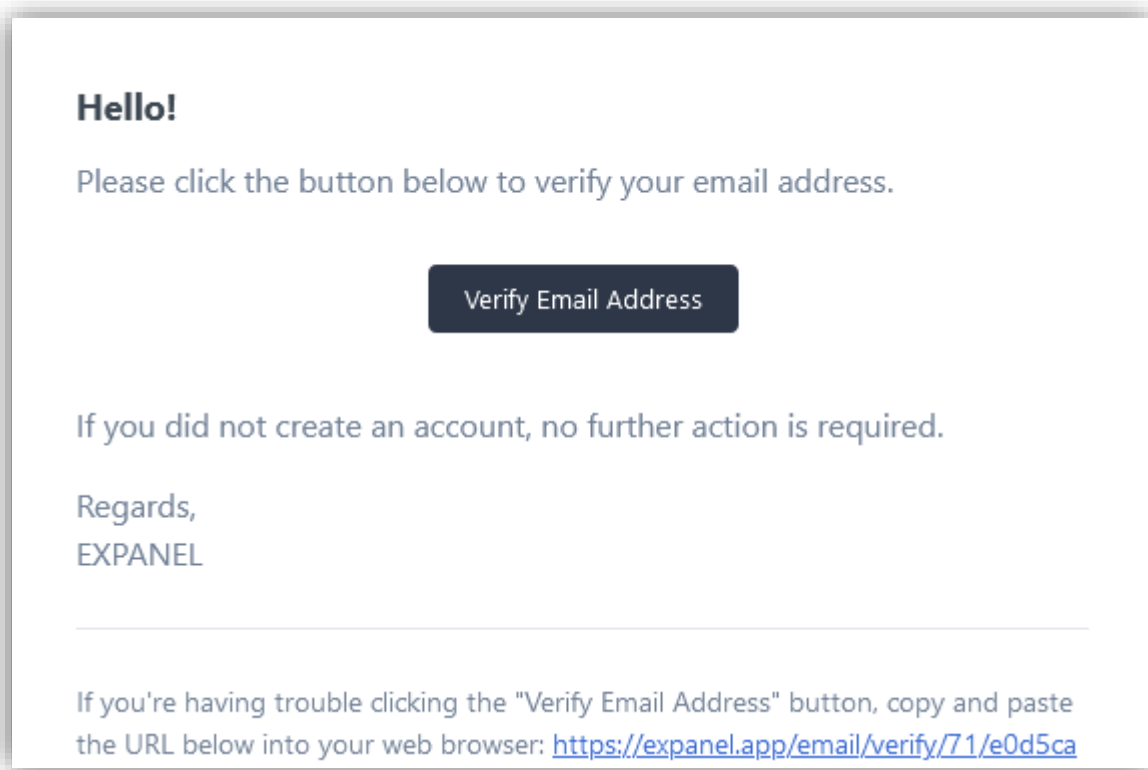

Finally, by clicking on the **Verify Email Address** button, your account will be activated. If the button is inactive, you can manually activate your account by clicking on the link at the bottom of the email.

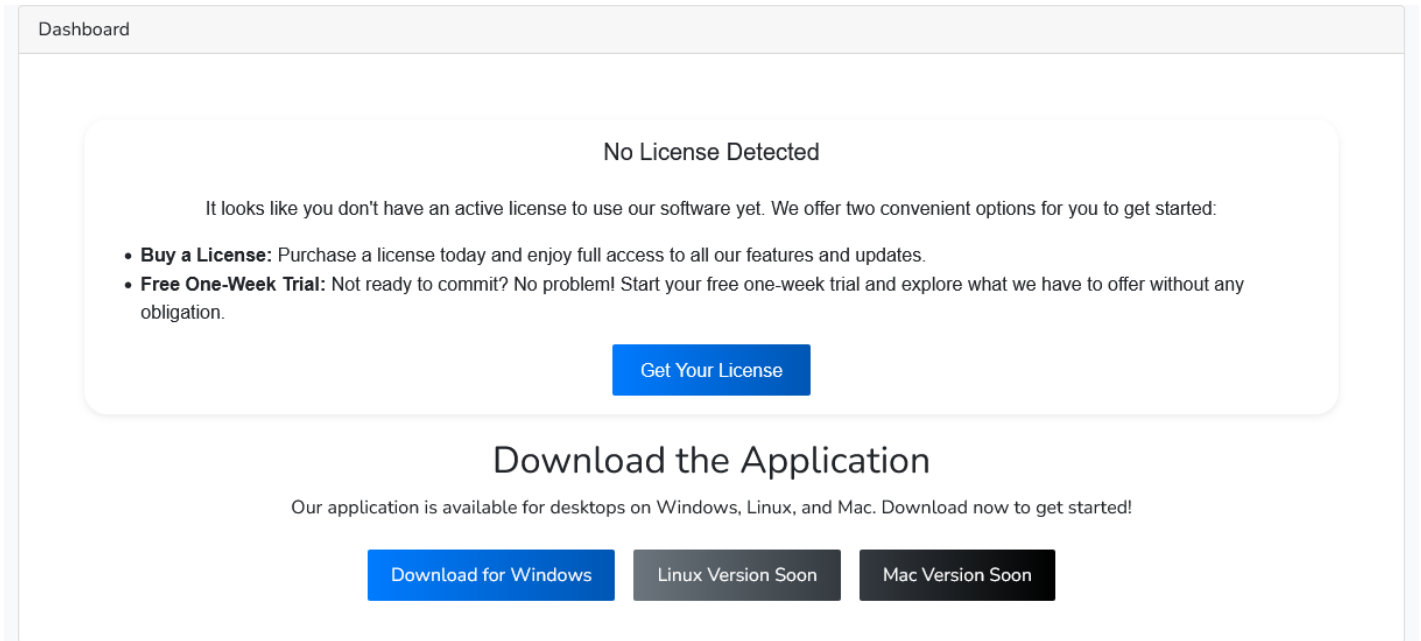

If you have activated your account, you will be redirected to the login page. On this page, you need to enter the email and password you used during registration to access your dashboard. To log in, click the "Login" button.

If you have enabled the "Remember Me" option, you will not need to enter your email and password on subsequent visits to the site, and you will be taken directly to your dashboard.
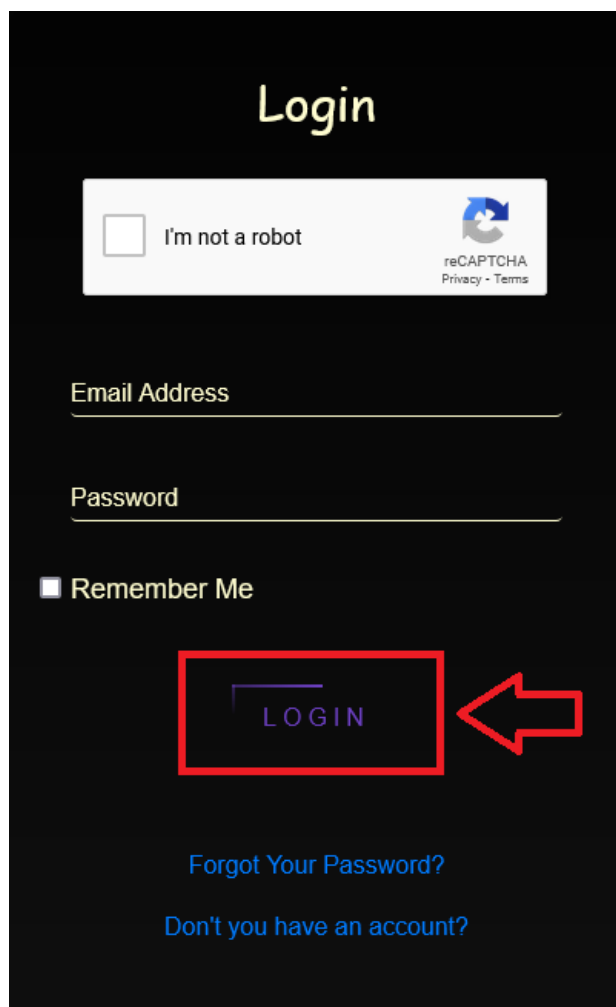

After logging into your dashboard, click on the appropriate download button based on your operating system to download the installation file.

The installation process is very simple and does not require any additional changes in any section. Simply click the "Next" button on each page to proceed to the next step. At the end, click the "Install" button to start the installation process.

If the installation steps are completed successfully, the installer will automatically install the prerequisites and a black window will be displayed. Please wait a moment for this window to close. After that, you can run the program by clicking on "Run Expanel."

1. On this page, select your desired language for the program. If the program does not restart after changing the language, you can click on the program's shortcut icon on the desktop to reopen it. Additionally, in the program settings, you can change the language in the future. In this tutorial, we will continue with English.
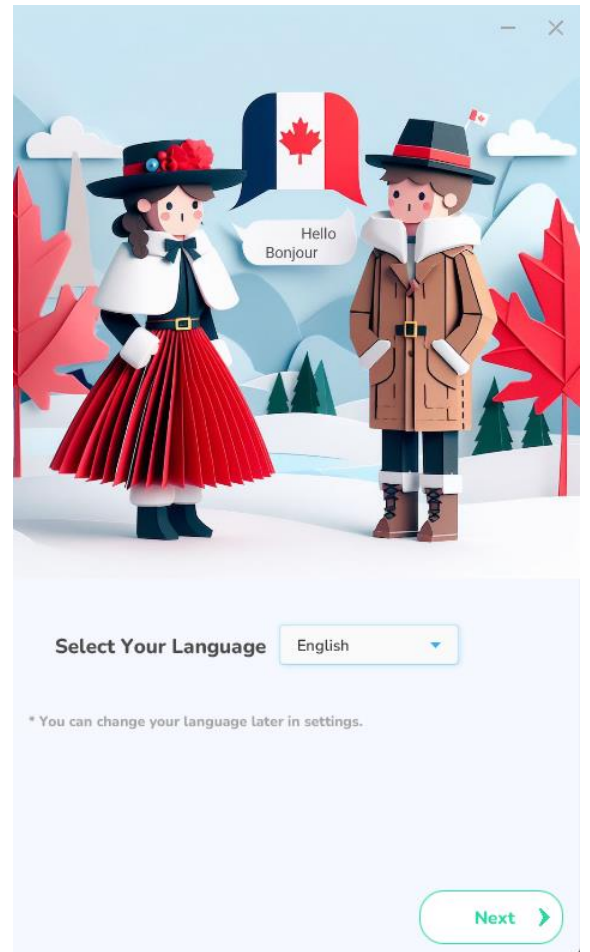

2. On the next page, you can set the light or dark theme for the program. Additionally, in the program settings, you will be able to change the theme in the future.
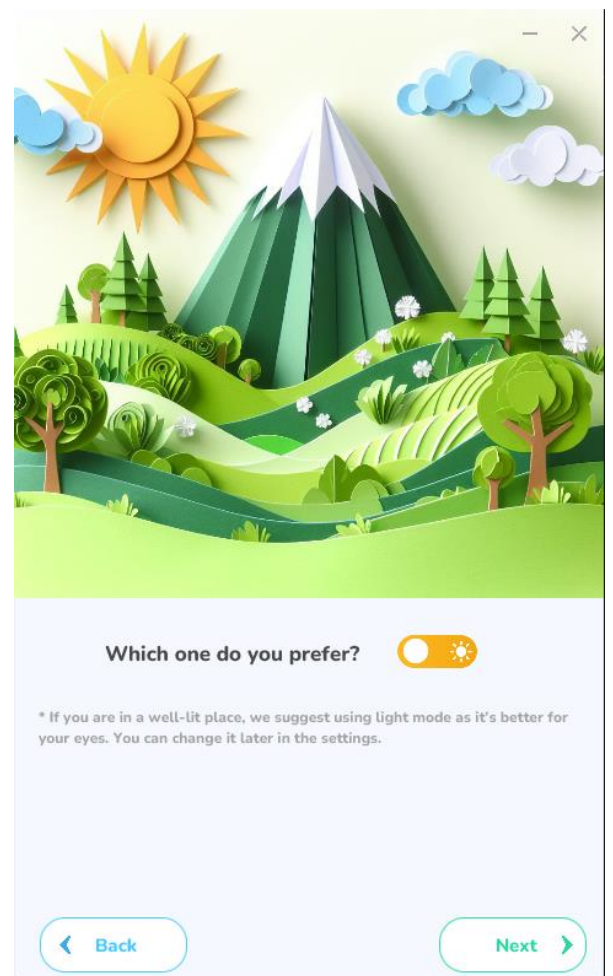

3. On this page, you need to specify which system Expanel will be prepared and run on. The database will be installed on the admin system, and all files and database information will be stored there. By selecting "Yes," we will proceed with the preparation steps.

4. On this page, you need to set a username and password for connecting to the database. For increased security, this information should only be available to the admin, and only the admin should enter it when accessing the program. Therefore, please store this information in a secure location. Note that the password must be at least 8 characters long.
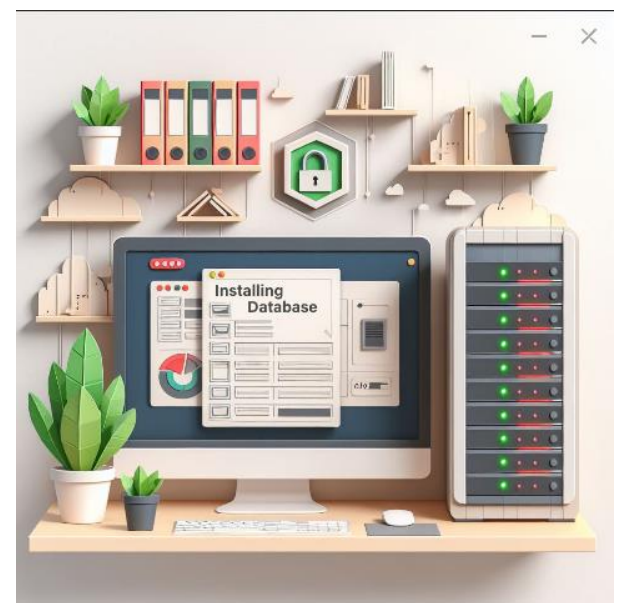

5. On this page, you need to set a username and password for accessing the program. This information is different from the information on the previous page! Therefore, please store this information in a secure location. Note that the password must be at least 8 characters long. After this step, the database installation process will begin.

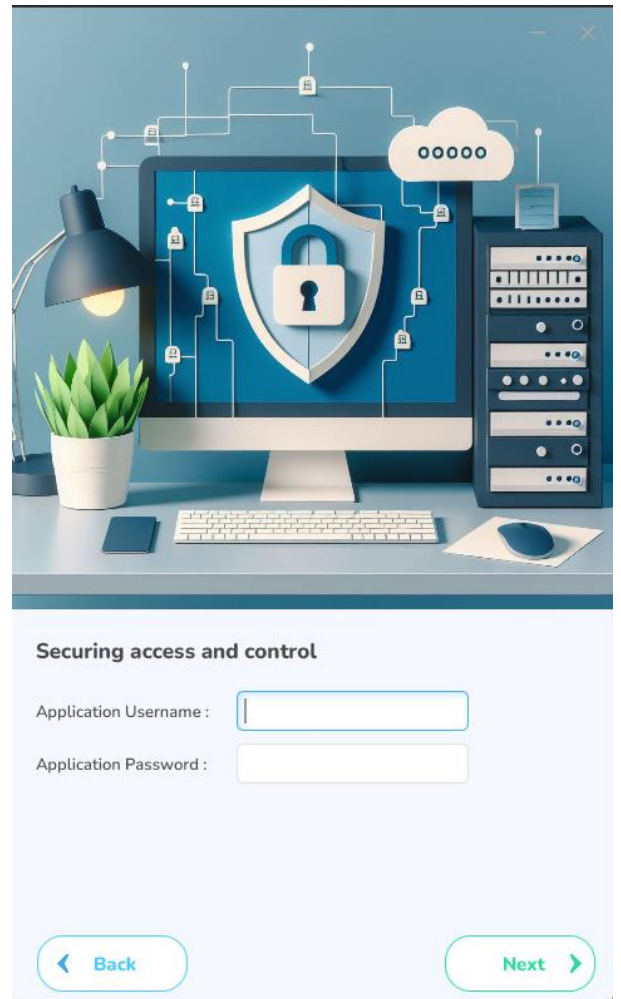

6. Allow the database installation and initial program data setup to complete. This step may take some time, so please be patient.
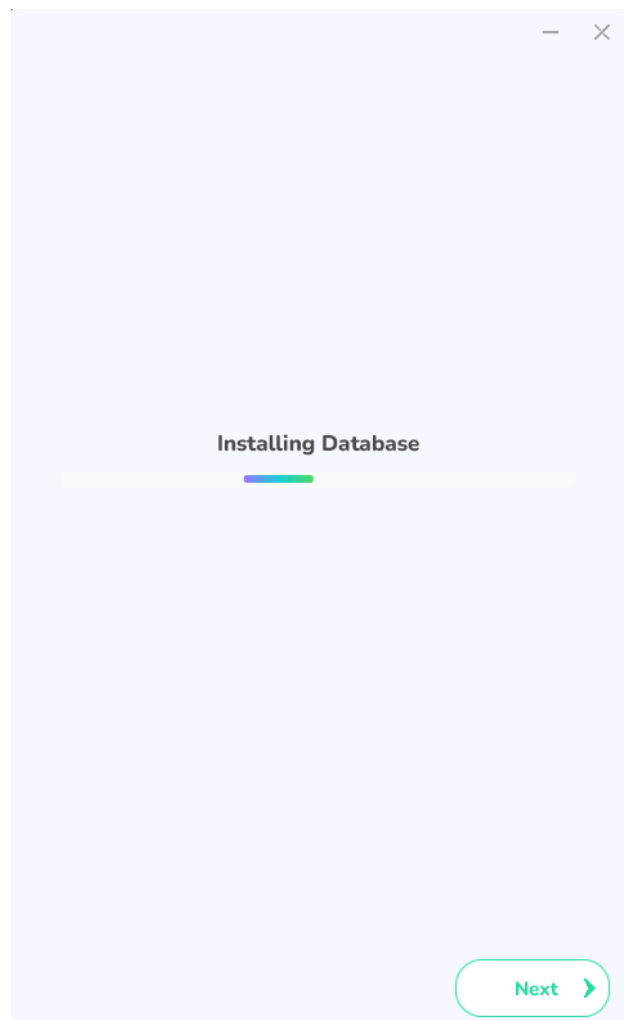

7. If all steps are completed successfully, this window will be displayed. By clicking on "Next," you will be redirected to the program login page. At any point during the process, you can contact our support team through the website for complete guidance.

Thank You For Installing Expanel.

To access the program, you first need to obtain your license key. To do this, go back to your dashboard on the website https://www.exanel.app. When you log in to your user panel for the first time, since you have not yet received a license, you will see the image below. To get a license, click on the "Get your license" button to obtain a free trial license, allowing you to evaluate the program's functionality.

License Page Instructions

1. Title: Choose a desired title.

2. Referral Code: If you have a referral code, enter it in this section.

3. License Duration: To obtain a trial license, select the first option. Note that the trial license can only be obtained once. If you are satisfied with the program, you can purchase longer durations from this section.

4. Number of Systems: By default, licenses support up to 3 systems (in addition to the admin system). If you have more employees, you need to select other options to allow all systems to connect to a single system simultaneously and monitor their performance.

5. Sanction API Requests: By purchasing each package in this section, you can search the names of 1,000 individuals to check their sanction status. Note that the purchase of a non-trial license includes a complimentary package as well.

Finally, after reviewing your purchase, click the Purchase button. If you have only activated the trial package, it will be activated immediately. Otherwise, you will be redirected to the payment page.

After obtaining the license, you will be redirected to the payments page. Here, we have obtained a trial license. Now, to log in to the program, click on your license key to copy it to the clipboard. Then, return to the program login page.

Your free trial License

ID	Title	License Key	Duration (Months)	Number of Systems	Sanction check
71	Expanel	HC1F-KTTD-HB7N-11MD	Free Trial	3	10

Total Paid Amount (CAD): $0

Purchase A New license

On the program login page, enter the license key in the designated field. In the top username and password fields, enter the login information for the program that you set up in step 5. In the bottom username and password fields, enter the database login information that you set up in step 4. Then click on the "Login" button. The license key and the username and password for the database connection will be saved, so you will not need to re-enter them on future logins.
